

Android

4/13 When +picture I can't choose picture in my album and videos don't even show up.

This hasn't changed

BLOCKING

This confuses me. It makes me look to the right instead of want to click on it.

Let's just use a gear for now.

SEE ALL

I was wrong on these lines. Please keep them consistent with the site.

They should be white and thick enough to show up....but not as thick as the border

When I minimize the website this is how the screen looks now.
It should keep the website header.

4/15 Still breaks on my computer.

Once it gets so small that the design looks different stop it from going smaller. See how FB does it.

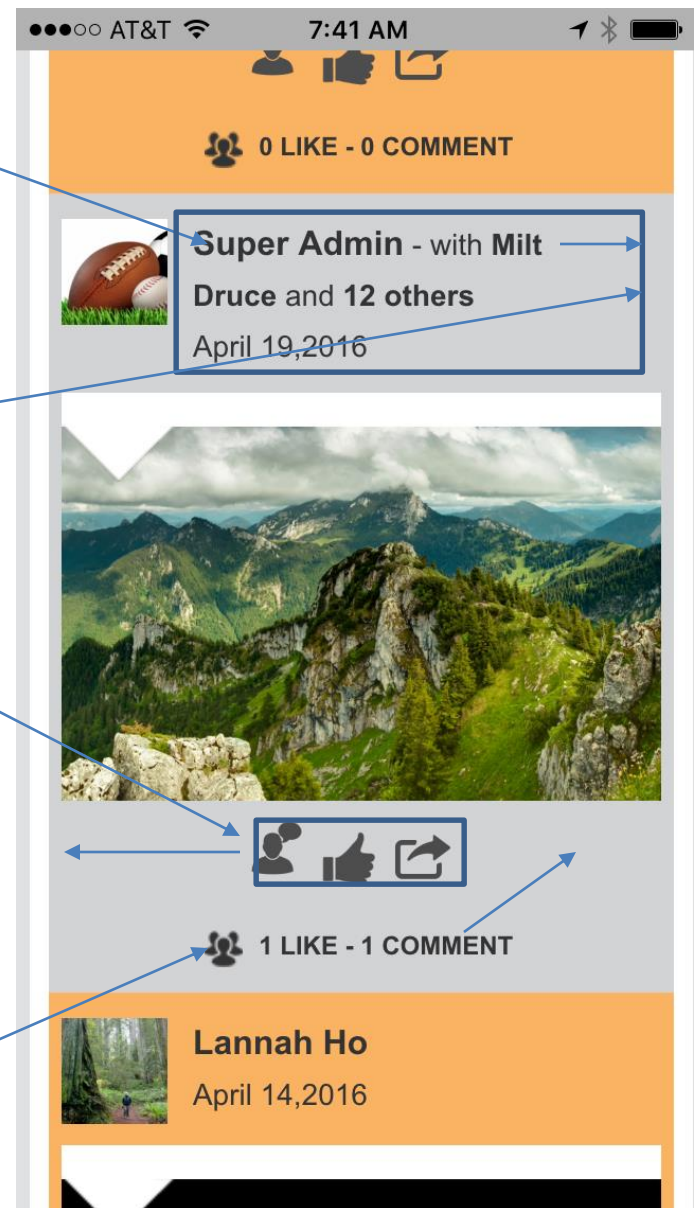

I think we need to make these fonts a little smaller. And everything needs to go as far as possible to the right.

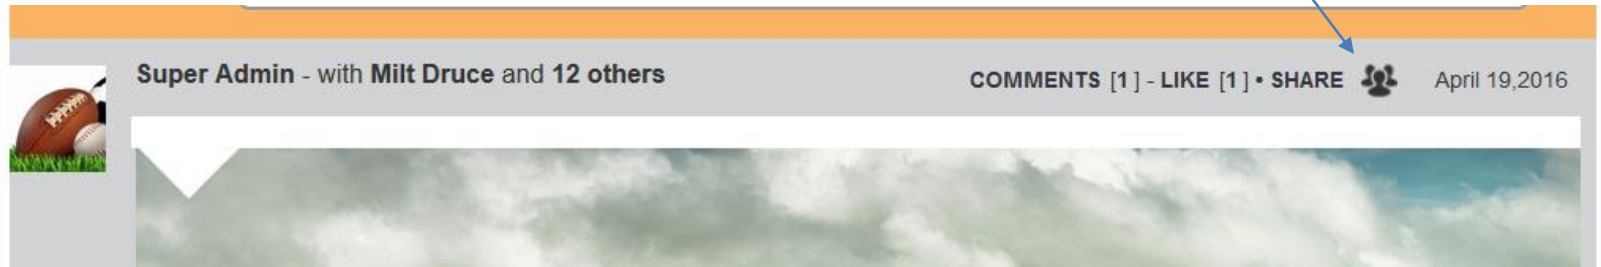

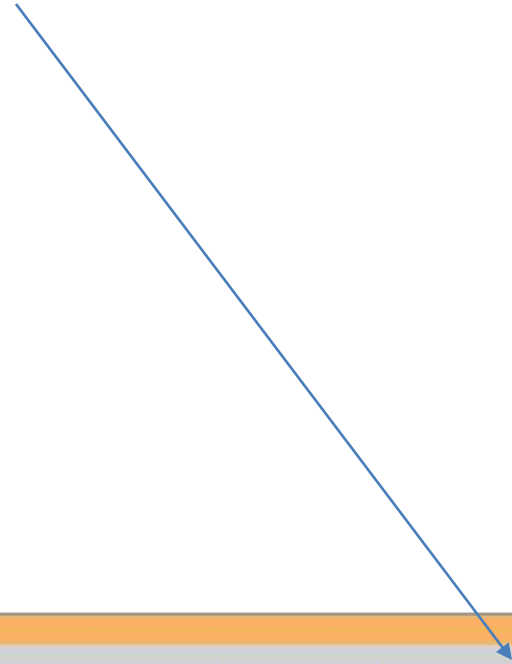

These need to be smaller. And slide to the left. See how small FB does it.

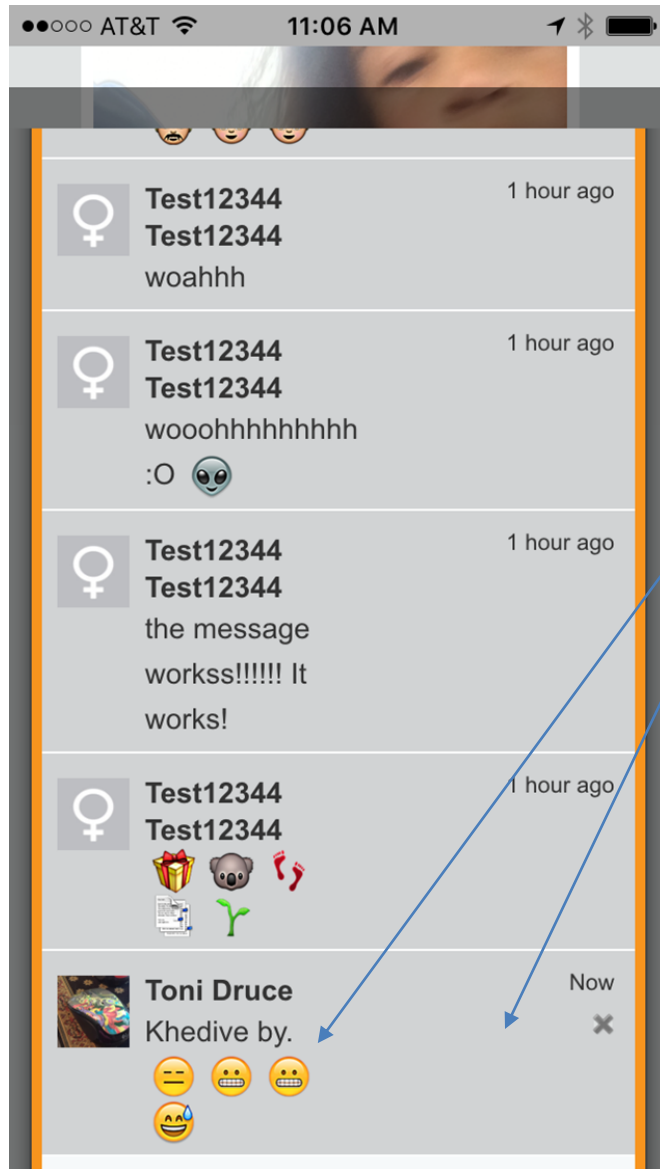

They can all go on the same line.

And take this ICON off

On the site take this off. It doesn't go anywhere.

Words and emojis should go all the way to the end

Lannah had the same comment.

These should be on the same line.

Then the emojis need to start like this one. I'm talking about the space under the name.

But go all the way to the right

Sports that need API's before we go live.

Sports we need Events for before we go live.

All of the Run:

5, 10 26.2 (this is a marathon) & Iron
Obstacle
Road
Ultra

Climb: This link might be helpful.

<http://www.rockandice.com/Default.aspx?PageID=13030209&A=SearchResult&SearchID=2641453&ObjectID=13030209&ObjectType=1>

Ride/Land:

Road & Mountain.

This has to be worked out before we go live.
