

Lannah 4/15 – this did not get changed because they were confused on the instruction. Change “Manage” wording to to the down arrow (similar to down arrow that’s next to friends.)

Use down arrow like you have for Privacy here and take off the word manage

You missed this part. Take off the word Manage and replace it with an arrow.

These and all the changes need to be made on the Experience page .

SEE ALL

I see what you are saying.

Could you make the line a little darker in between?

When I minimize the website this is how the screen looks now.
It should keep the website header.

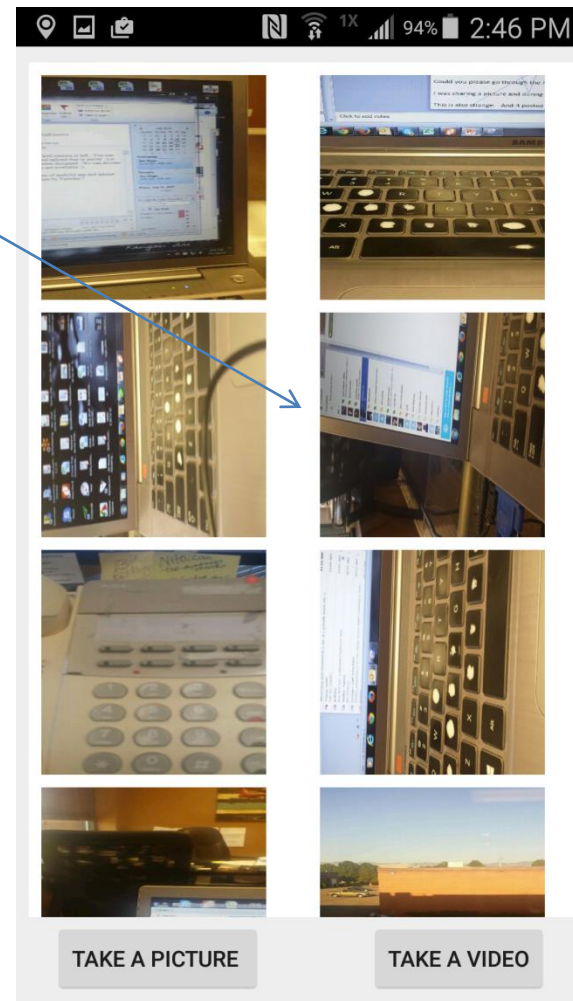

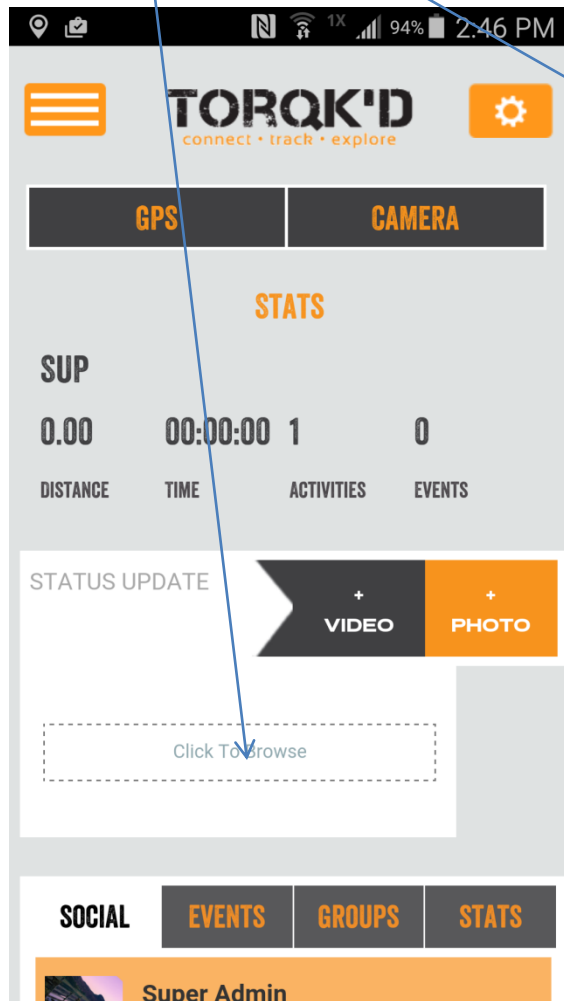

4/15 Still breaks on my computer.

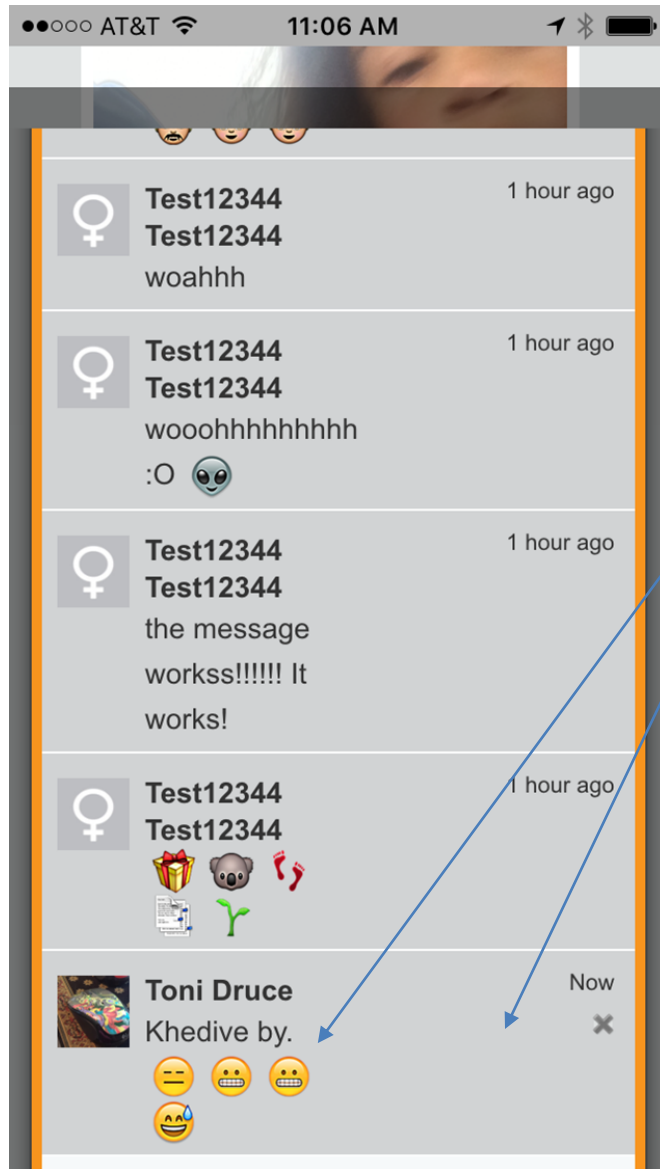

Once it gets so small that the design looks different stop it from going smaller. See how FB does it.

Android

4/13 When +picture I can't choose picture in my album and videos don't even show up.

This hasn't changed

Words and emojis should go all the way to the end

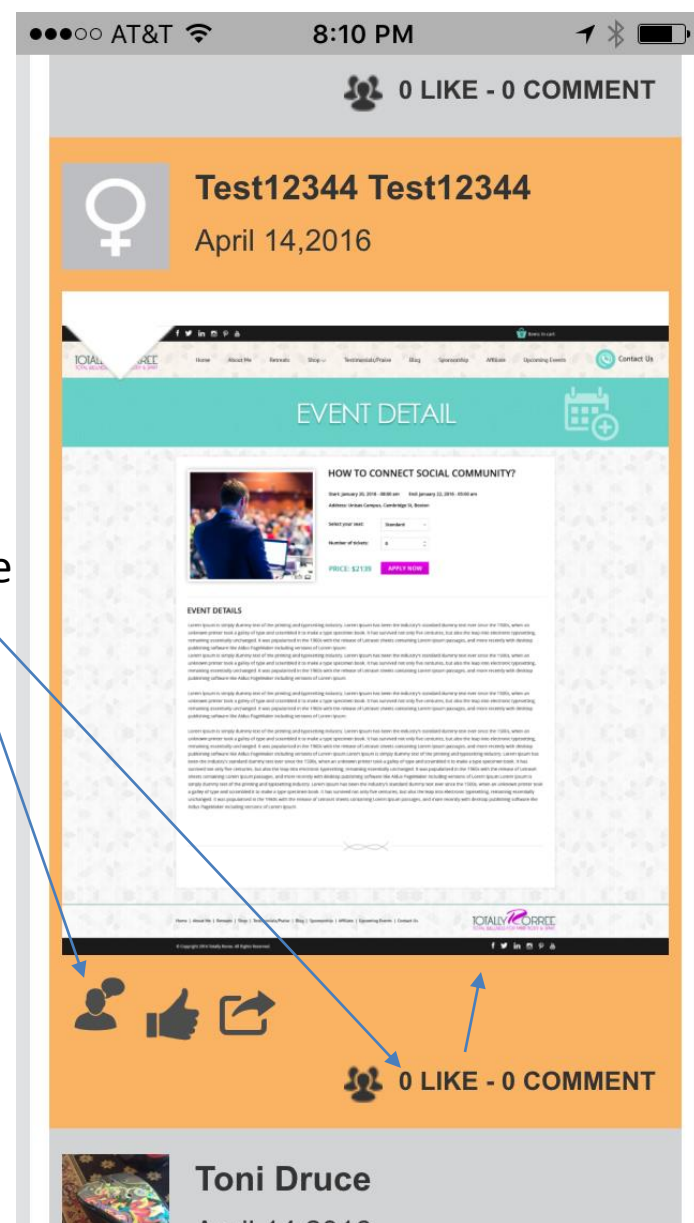

Lannah had the same comment.

Notifications: iPhone

Today emojis don't show up for me.

These should all be on one line.

I see what you are saying here. I think if

Sports that need API's before we go live.

Sports we need Events for before we go live.

All of the Run:

5, 10 26.2 (this is a marathon) & Iron
Obstacle
Road
Ultra

Climb: This link might be helpful.

<http://www.rockandice.com/Default.aspx?PageID=13030209&A=SearchResult&SearchID=2641453&ObjectID=13030209&ObjectType=1>

Ride/Land:

Road & Mountain.

This has to be worked out before we go live.
